Personal Wealth & Investing Plan

Quick Snapshot

Income (monthly)		**Total assets**	
Expenses (monthly)		**Total debts**	
Cash flow (income – expenses)		**Net worth**	
Top 3 financial concerns & the dollar amount that would resolve them			
1. Concern:		Amount Needed: **$**	
2. Concern:		Amount Needed: **$**	
3. Concern:		Amount Needed: **$**	

The 3-Bucket Plan

Use the 3-bucket system to allocate your money based on when you'll need it. Short-term funds stay safe and accessible, mid-term money goes into low-risk assets, and long-term money is invested for growth. This approach protects your downside while maximizing long-term returns.

Short-Term Bucket (0–1 yr)		**Mid-Term Bucket** (3–4 yrs)		**Long-Term Bucket** (10+ yrs)

One-Page Cheat Sheet

(Examples, formulas & guidance to help you fill this out)

Example Numbers		
• Monthly income:	$6,000	
• Monthly expenses:	$4,200	
• Cash flow:	$1,800 surplus	
• Emergency fund target (5 months):	$4,200 × 5 = $21,000	
• Long-term investing:	$500/month into index funds	
• Life insurance need:	» Income replacement:	» $100,000/year × 20 = $2,000,000
	» Debts + future costs:	» $300,000
	» Existing assets:	» $400,000
	» Insurance gap:	» $1,900,000 → Term policy for 20 years
Key Formulas		
1. Net Worth =	Total Assets – Total Debts	
2. Emergency Fund =	Monthly Expenses × 3–6	
3. Life Insurance Need =	(Annual Income × 20) + Debts + Future Costs – Investable Assets	
4. Long-Term Investment Target =	What You Can Leave Untouched for 10+ Years	
Bucket Guidance		
• Short-term bucket =	Safety, no risk, easy access	
• Mid-term bucket =	Bonds / conservative	
• Long-term bucket =	Stocks, index funds, growth-oriented
